P-Key Upgrade

Smart Card Driver installation

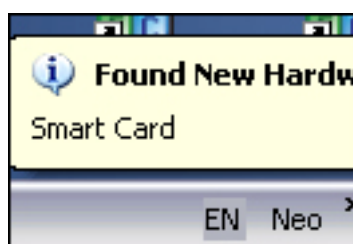

1. Go to: <http://files.odeon.cn/PKey-driver.rar>
2. Click on the archive: **PKey-driver.rar**, download and extract into a folder.
3. Install **Driver_setup_English** and it will restart your PC after the process is complete.

4. After the restart is complete, connect the P-Key dongle to your PC USB-Port. Windows will automatically install the drivers for the dongle.

5. Once the drivers are installed you will get the "New device is installed and ready to use" balloon popup message.

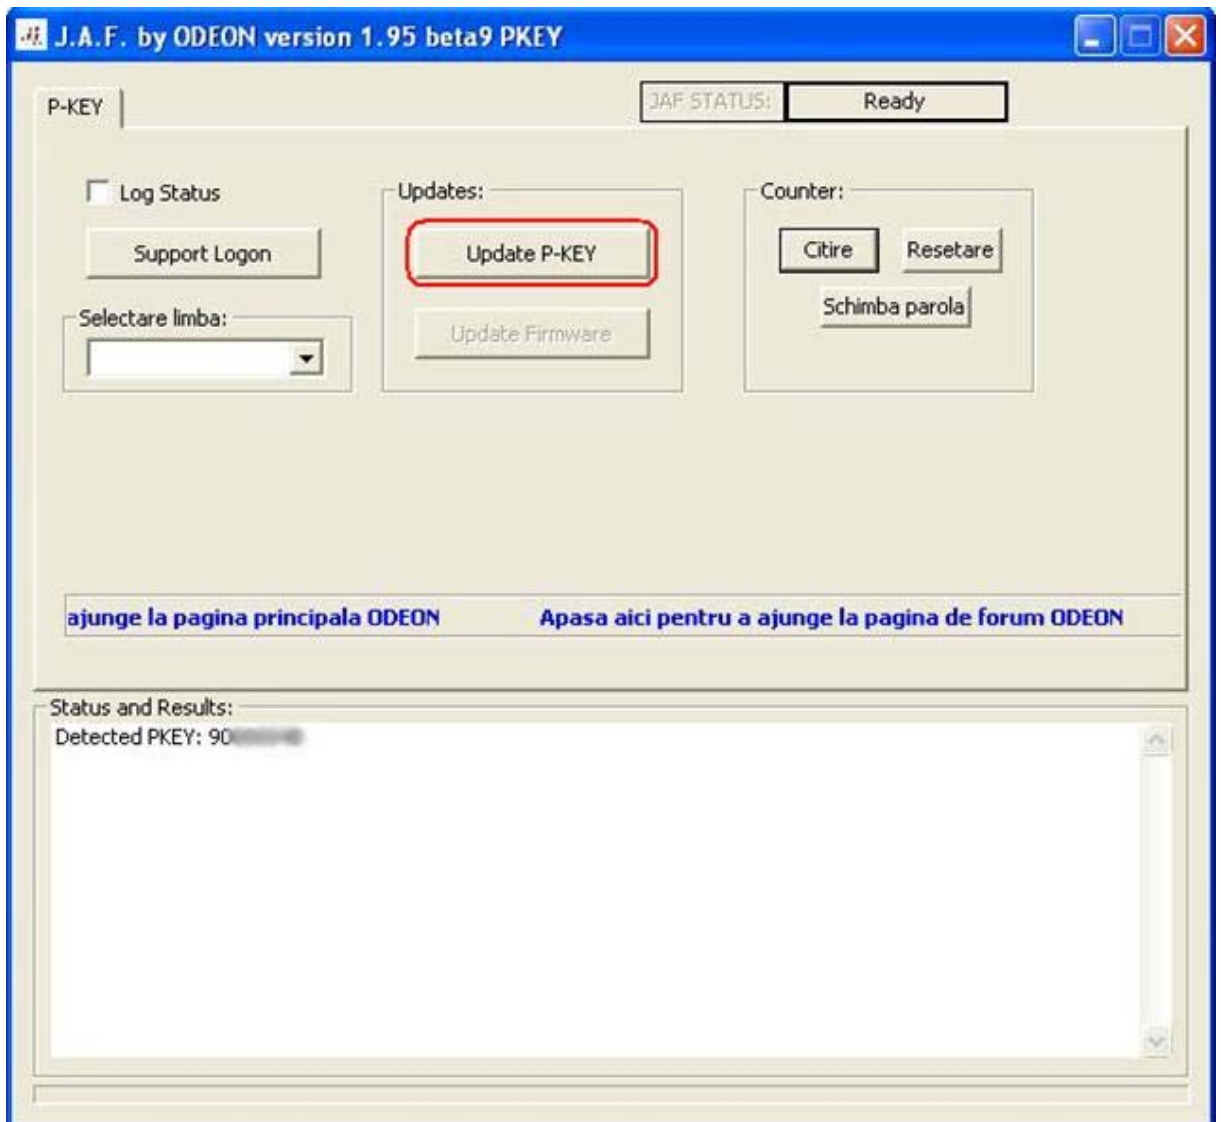

P-Key online update and JAF firmware upgrade

1. Leave the P-Key dongle connected and then connect to another USB port your JAF Box.

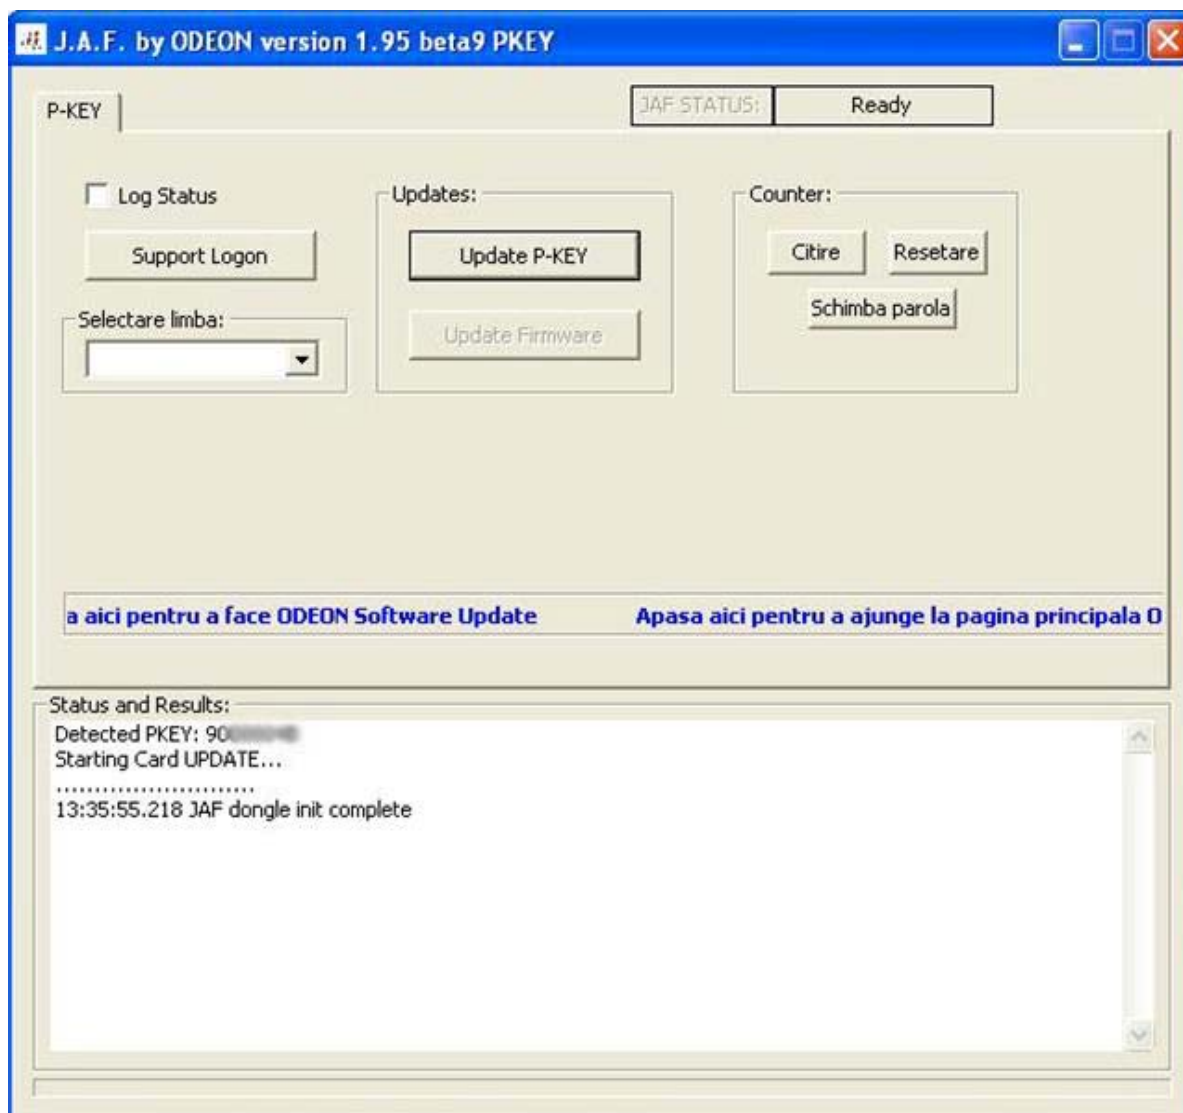

2. Open JAF software version 1.95 beta 9. (The software will read and display your P-Key dongle serial number).

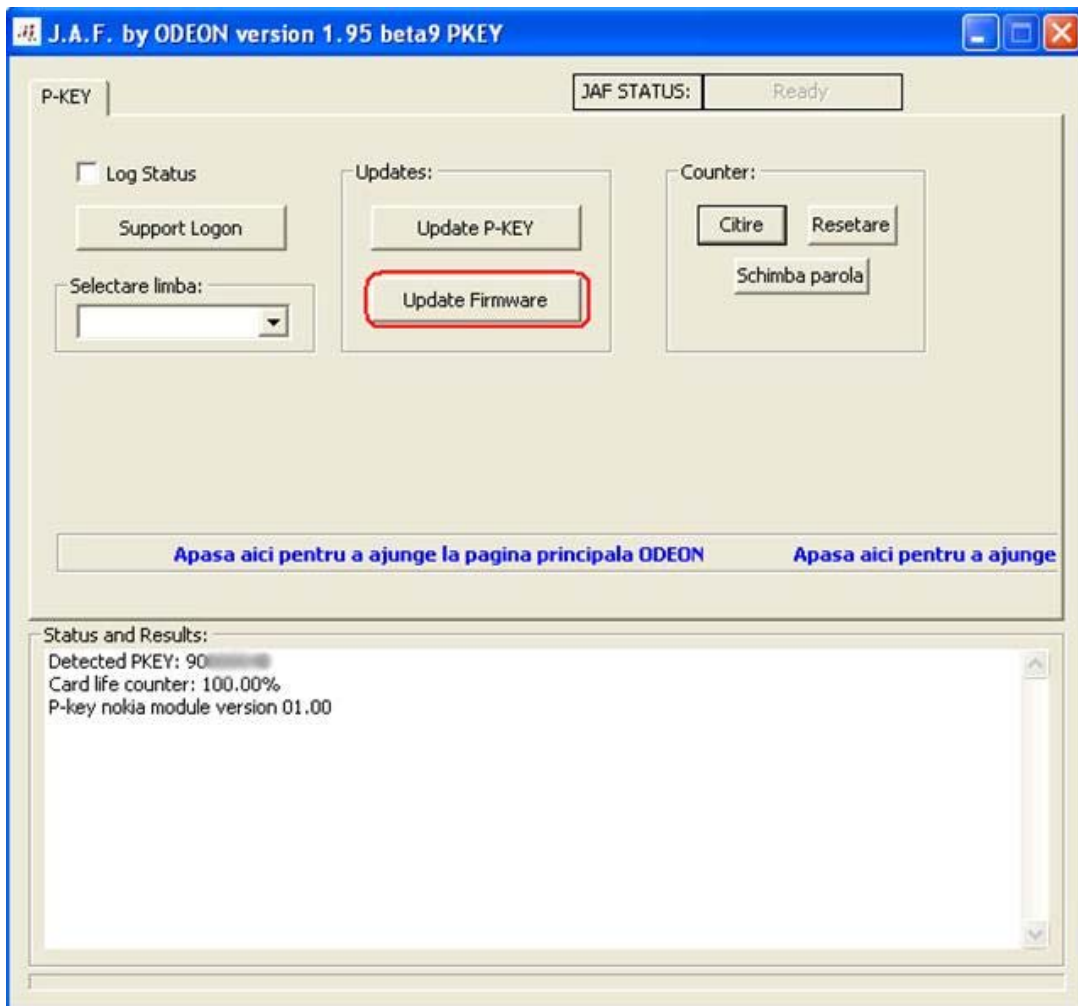

3. Click the **“Update P-Key”** button. When the server will complete the card update process, the message **“JAF Dongle init complete”**

ATTENTION: Make sure, your computer is connected to Internet!!!

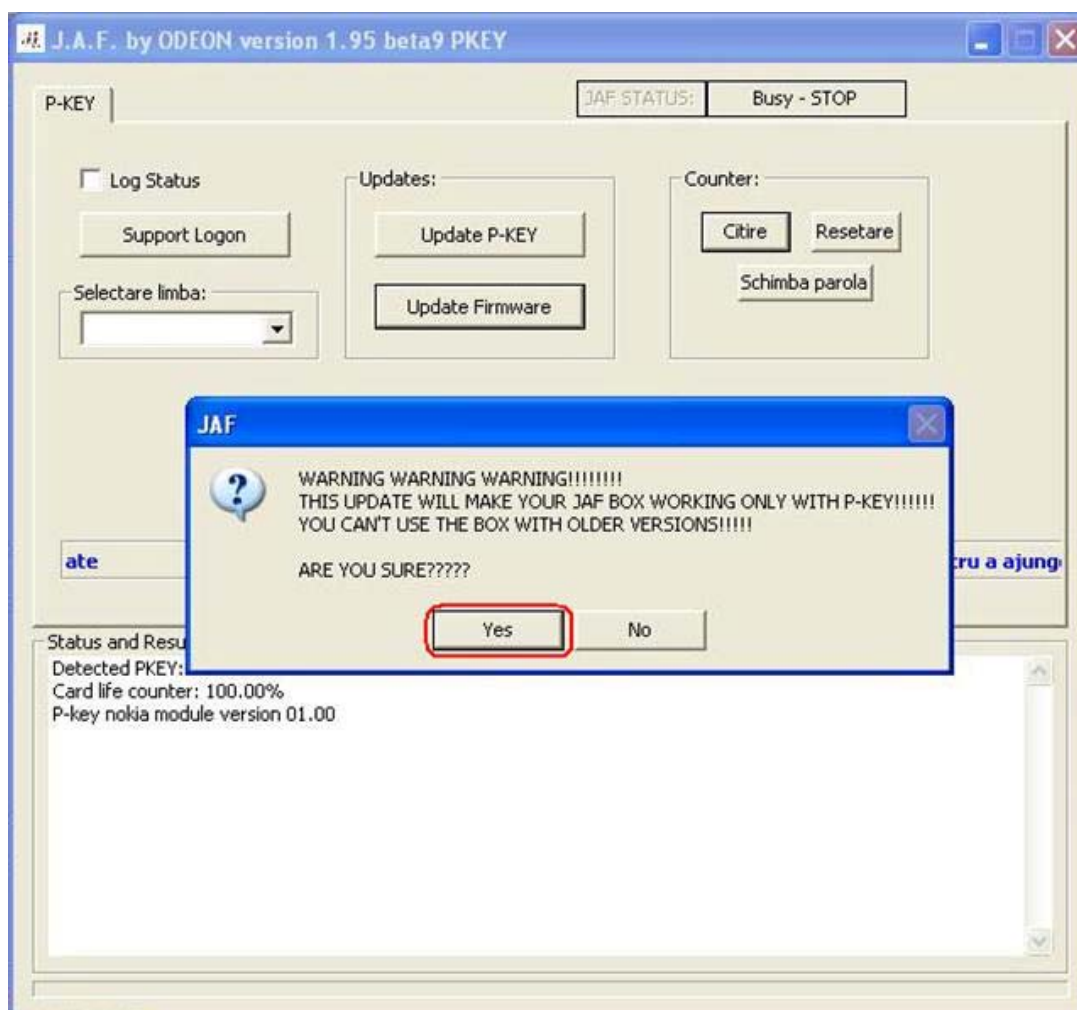

4. Restart the JAF Software and you will see the **“Update Firmware”** button now active.

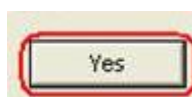

5. Click **"Update Firmware"** and the software will display follow warning message:

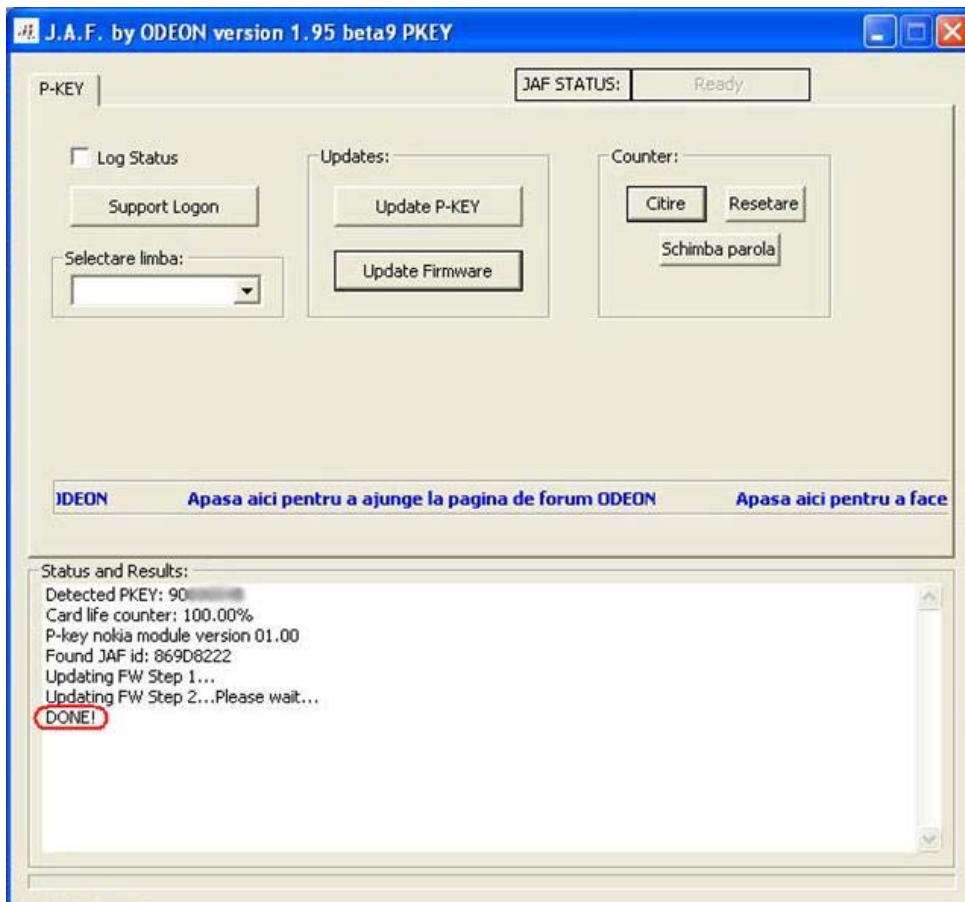

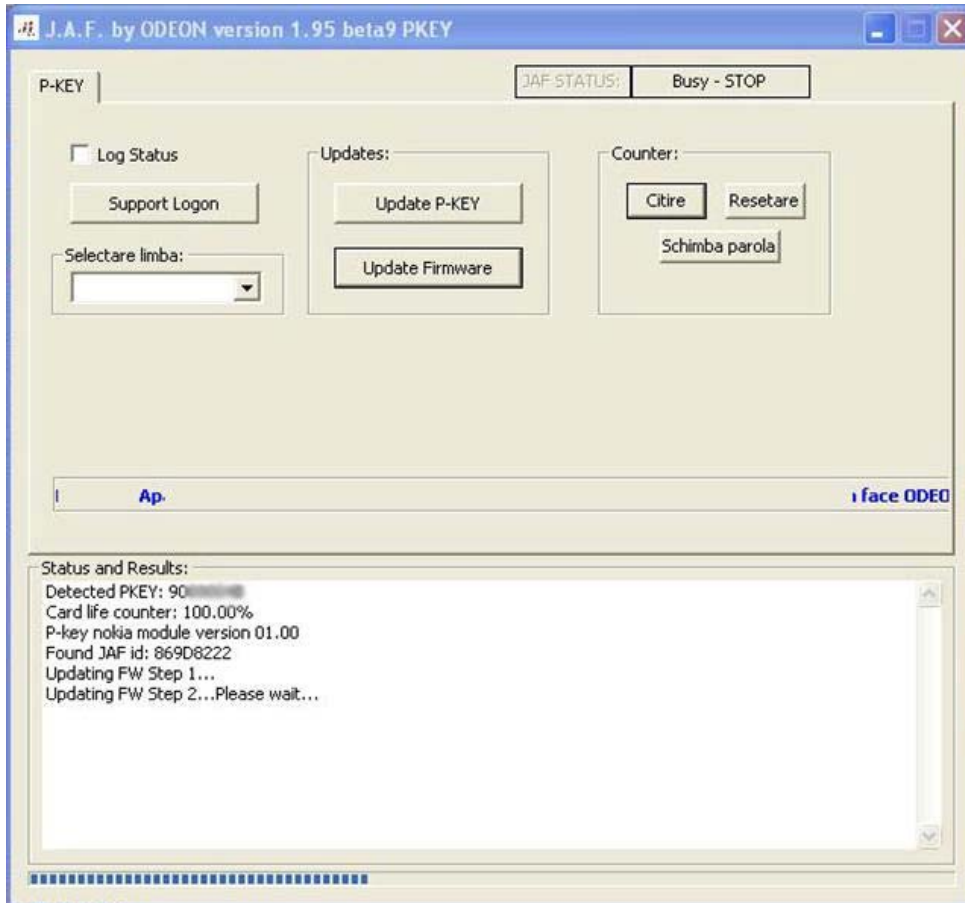

"Warning! This update will make your JAF BOX working only with P-key. You cannot use the box with older versions, are you sure???"

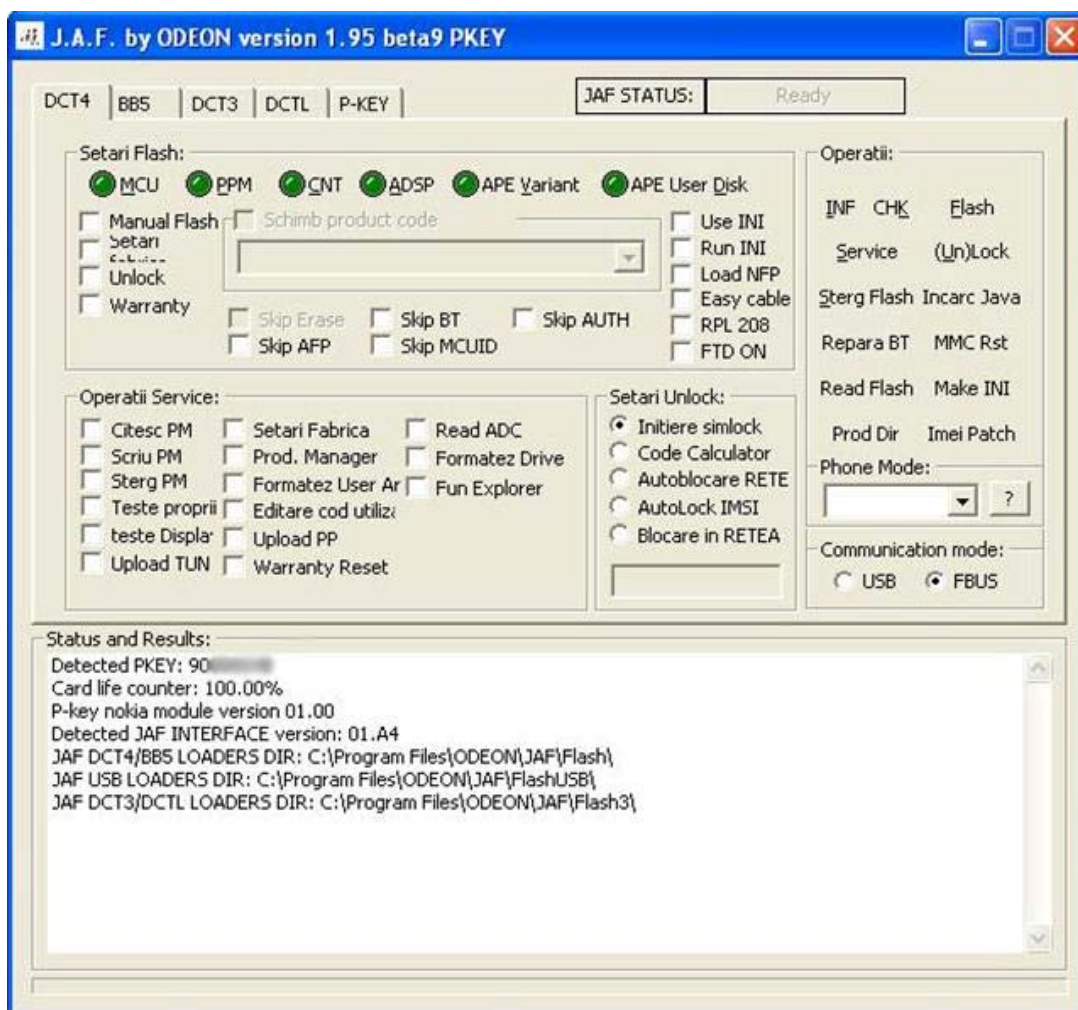

6. Click **"YES"** but only if you have purchased already a P-Key dongle from your reseller. Also you have to make sure that your computer is connected to internet.

7. The server will update the box firmware; wait until you see the message "Updating FW Step 2...Please wait...DONE!"

8. Restart JAF Software version 1.95 beta 9 and from now on you can use the new updates offered by the ODEON TEAM by using the new P-key dongle.

10. Congratulations, you have now upgraded your JAF and can use it with all software versions. Make sure to update your smart card online [each time we release a new software version.](#)

NOTE:

You have time to purchase a P-Key dongle for 20 Euro from your reseller maximal 60 days from 05.05.2006. You have to provide him follow information:

- 1.) JAF serial number
- 2.) Name of reseller
- 3.) Date of purchase

F.A.Q.

What is P-Key?

P-Key is the new smart card based protection used for JAF.

What have P-Key common with JAFWM?

NOTHING. P-Key is a dongle protection used by JAF team for 2 different products from JAF team (JAF and JAFWM). It is also NOT POSSIBLE for customers with JAFWM to update it to PKEY for JAF or vice versa.

How much distributors purchase P-Key from producer and how much does it cost for the public?

The price is 10 Euro/pcs P-Key and you should sell it please NOT higher than 20 EURO. Delivery costs and local taxes are not included in the prices mentioned above. Our all goal should be to keep the price as low as possible and to get this dongles in customers hand as fast as possible.

Do I really need to buy P-Key for my JAF box?

We do not force any one buy it, but every one should understand that also we have to improve our protection and this costs money for all of us. So, if you want also use your JAF with higher versions as 1.95 beta, you must buy it, if you are happy with your JAF box and all software versions released until version 1.95beta1, than you no need buy it.
